### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

#### In the Claims

Claim 11, line 6, "an" has been changed to --the--.

#### Remarks

2. The above change was made to clarify the claimed invention and was not made to alter the scope of the claimed invention. In particular, the change was made to clarify that the exposed portion of the magnetic member is outside of the handle in which the magnetic member is mounted (i.e., the associated one of the handles).

#### Additional Prior Art

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The newly-cited prior art disclose inventions which have features similar to the claimed invention. However, these inventions, each taken alone or in combination with the prior art of record, do not teach or fairly suggest the claimed invention.

### **REASONS FOR ALLOWANCE**

4. The following is an examiner's statement of reasons for allowance:

None of the prior art of record, either taken alone or in combination, teaches and/or fairly suggests the claimed invention. For example, the prior art of record does not teach or suggest a pair of scissors comprising two cutting members as claimed, each cutting member including a handle having a first side and a second side, a first groove as claimed, a second groove as claimed, and a magnetic member being mounted in each said first groove in a manner that said magnetic member has an exposed portion outside the respective handle, said exposed portion of each magnetic member of the pair of hairdressing scissors being adapted to be securely engaged with a second groove of a respective handle of a pair of similarly constructed scissors. It is noted that the limitation "a magnetic member being mounted in each said first groove in a manner that said magnetic member has an exposed portion outside the respective handle" has been interpreted such that a portion of the magnetic member extends out of the groove and protrudes from the handle, else it would not be "outside the respective handle." Further, the portion of the magnetic member has been considered to protrude from the handle such that it can be inserted into the second groove of a similarly constructed pair of scissors so as to be securely engaged therewith.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
